## Endeavor® Line Case Study: Miami

# ENDEAVOR™

ENDEAVOR® PROVIDES A COOL INDOOR OASIS IN A MIAMI HOME

**In the heart of Miami's relentless heat and humidity, Katerina and Yinon Horwitz embarked on a journey to create a haven of comfort for their young family.** The only problem: Their two-story home's aging HVAC system didn't stand a chance against Florida's hot

temperatures.

The Horwitz family sought the expertise of Adrian Gonzalez, president of A&P Air Conditioning, to guide them through the myriad of heating and cooling options available. The units were from 2011, and they had accumulated years of dust and debris that compromised the system's cooling efficiency and air quality. Additionally, the system struggled to maintain a balanced temperature, leading to excessive heating on one floor and overcooling on the other.

After careful consideration, the A&P team decided that the Rheem Endeavor® Line *Classic Plus*® Series Variable Speed Air Conditioner and 3-Stage Air Handler were the ideal solutions to address each of the issues at hand. Designed in response to tougher Department of Energy regulations that took effect this year, the Endeavor Line provides dependable comfort throughout the home while offering high energy efficiency and reduced energy bills.
